ENGLANDER IS THE ECO-FRIENDLY CHOICE.

Saving
the planet,
one bed
at a time.

BETTER SLEEP, BY DESIGN.™

AT ENGLANDER we believe it is the equal responsibility of every company to do what it can to preserve and improve the earth. With that philosophy in mind, Englander is committed to a more environmentally responsible approach to operations, including the use of renewable resource materials, reduced energy consumption and recycling.

ECO-FRIENDLIER MATTRESSES

Englander mattresses are better for you and better for the environment.

- Natural bamboo and cashmere covers plus natural cotton comfort layers provide luxurious comfort.
- Soy- and other bio-based visco and polyfoams significantly reduce the amount of petroleum used in every mattress, helping to save the Earth's limited natural resources.
- Natural rubber latex, made from the sap of the rubber tree, is completely petroleum-free.
- Foundation units feature Canadian Spruce wood, limiting the use of non-renewable raw materials.

ECO-CONSCIOUS MANUFACTURING

Englander is committed to making mattresses that provide exceptional comfort and value, while demonstrating environmentally sound business and manufacturing practices.

- We actively search for materials that are eco-friendly in all aspects of production and, whenever possible, choose materials that are natural and processed without toxins.
- We conduct regular energy usage audits resulting in more energy efficient lighting throughout our factories.
- We print brochures and other collateral materials on recycled papers, whenever appropriate.
- We implement paperless solutions where possible company wide.
- We recycle foam and paper scrap.
- We pursue the use of more earth-friendly packaging alternatives.
