

At Englander, we believe it is the equal responsibility of every company to do what it can to preserve and improve the earth. With that philosophy in mind, Englander is committed to a more environmentally responsible approach to operations, including the use of renewable resource materials, reduced energy consumption and recvcling.

ECO-CONSCIOUS MANUFACTURING

Englander is committed to making mattresses that provide exceptional comfort and value, while demonstrating environmentally sound business and manufacturing practices.

- We actively search for materials that are eco-friendly in all aspects of production and, whenever possible, choose materials that are natural and processed without toxins.
- We conduct regular energy usage audits resulting in more energy efficient lighting throughout our factories.
- We implement paperless solutions where possible company wide.
- We print brochures and other collateral materials on recycled papers, whenever appropriate.
- We recycle foam and paper scrap.
- We pursue the use of more earth-friendly packaging alternatives.

THE MATTRESS THAT MAKES A DIFFERENCE.

INTRODUCING NATURE'S FINEST® ORGANIC SLEEP SYSTEMS BY ENGLANDER®

Since a great night's sleep is the foundation of a healthy and happier lifestyle, we set out to create a mattress that is not only better for you, but better for our planet. Englander's Nature's Finest* organic sleep systems reduce your exposure to chemicals without sacrificing sleeping comfort. Each mattress is handcrafted

from the highest quality, certified organic materials. Pure, natural rubber latex, 100% organic cotton fabric and organic New Zealand wool provide luxurious comfort and are toxin-free.

Nature's Finest[®] organic sleep systems will make a difference in how you sleep, how you feel and how we take care of our environment.

> Our organic mattresses feature two identical sides for double the comfort and longevity.

CERTIFIED ORGANIC COTTON provides soft, luxurious comfort. Cotton is breathable so it ventilates body heat to keep you cool and comfortable all night long. No chemicals or irritants are used in growing or processing, making it safer for you and the environment.

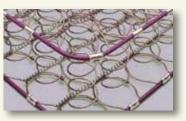

ORGANIC NEW ZEALAND WOOL COMFORT LAYERS

are naturally flame-resistant. Wool also wicks away moisture, helping to regulate your body temperature, to keep you drier and more comfortable for sounder sleep all year long.

NATURAL RUBBER LATEX is made from the sap of the rubber tree and is completely petroleumfree. Offering personalized sleeping comfort, it gently conforms to the shape of your body to ensure proper spinal alignment and the reduction of pressure points. You'll experience undisturbed, more restful sleep.

RECYCLED STEEL The steel in our coil unit is made with recycled materials and is 95% recyclable.

SUSTAINABLE WOOD Our foundation units feature furniture-grade sustainable wood that is untreated and has no chemical additives.
